## SCIENTIFIC PROGRAM

The 4<sup>th</sup> International Conference of the Chemical Societies of the South-East European Countries on *Chemical Sciences in Changing Times: Visions, Challenges and Solutions* will cover all aspects of pure and applied chemistry. The following accompanying symposia are also planned:

### **A. Advanced Materials: From Fundamentals to Applications:**

Nanostructured materials, biomaterials, ceramics, macromolecules, metals and alloys, composites, coatings and thin films, carbon-based materials, methods for the synthesis and processing of materials.

### **B. The Greening of Chemistry: Pursuit of a Healthy Environment and Safe Food:**

Renewable or recycled feedstocks, alternative synthetic pathways by catalysis and biocatalysis, photochemistry and biomimetic materials, reduction of energy consumption and release of pollutants, reduction and destruction of dangerous and other waste, the introduction of "clean" technologies, organically grown crops, genetically modified crops, agrochemicals.

### **C. Teaching and Understanding Chemistry: New Concepts and Strategies for Changing Times:**

Dedicated to 150 years of teaching chemistry in Serbia.

Introduction to chemistry chemical education at the elementary level, high school chemistry, university courses in chemistry, active learning in chemistry, permanent education, the public image of chemistry and the chemical industry.

Authors are invited to present their contributions in the form of oral or poster presentations. The number of oral contributions will be limited and the Scientific Committee reserves the right to decide on the form of presentation.

The following speakers have consented to deliver Plenary lectures at the Conference:
